PRESENTER:

TARGET AUDIENCE
This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

COURSE OVERVIEW
This one-hour intended for clinicians and equipment suppliers who have a desire to understand the steps needed to be successful in the provision of complex power wheelchair rehabilitation technology (CRT). In many care settings, where time and resources are limited, there can be the potential to provide low end seating and positioning products versus what the patient may truly need. This course is intended to be an overview to transitioning your practice from general use and standard equipment to the ideas of best practice tissue protection and proper postural positioning.

The course will utilize clinical applications of individual cases where outcomes could be improved with simple understanding of how to navigate the equipment provision landscape in accordance to the International Classification of Functioning, Disability & Health (ICF). In addition, guidance and tools will be provided to assist with clinical decision-making process, to take the guess work out of who needs complex rehab technology. Upon completion of this course, attendees will feel prepared to initiate referrals, recommend appropriate equipment, and optimize client outcomes for success with long-term power wheeled mobility solutions.

LEVEL— Beginner | INSTRUCTIONAL METHOD— Lecture | Discussion | Clinical Application | Demonstration

CEU OBJECTIVES
By the end of the presentation, participants will be able to:
1. Identify three postural limitations that can impact your choice of seating and positioning products
2. Utilize the ICF model to identify two situations when seating and positioning should be evaluated
3. Give examples on how seating and positioning products can inhibit or improve patient function within their mobility system
4. Understand standard seating and mobility measurements as it applies to seating and positioning
AOTA CLASSIFICATION CODE(S)— Category 2: Occupational Therapy Process

STATEMENT OF CLINICAL RELEVANCE
Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). Visit our website www.permobilus.com for more details.

COMPLETION REQUIREMENTS
In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

This course content is not intended for use by participants outside the scope of their license or regulation.

ProCert has awarded certification in the amount of 1 Continuing Competence Units (CCUs) to this activity. CCUs are a unit of relative value of an activity based on its evaluation against a rigorous and comprehensive set of standards representing the quality of an activity. The CCU determination is a valuation applying many factors including, but not limited to, duration of the activity. No conclusion should be drawn that CCUs correlate to time (e.g. hours).

Permobil Academy has been reviewed and approved as an AOTA Approved Provider by The American Occupational Therapy Association, Inc., 4720 Montgomery Lane, Bethesda, MD 20814. Permobil Academy has awarded .1 AOTA CEUs to participants who successfully complete this program. The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA. Permobil Academy is a division of Permobil, Inc.
