Intended Use

The ROHO® Hybrid Elite® Cushion (Hybrid Elite Cushion) is an adjustable, air-filled, wheelchair support surface combining a ROHO DRY FLOATATION® cellular design cushion insert with a contoured foam base and is intended to conform to an individual’s seated shape in the pelvic loading area to provide skin/soft tissue protection, positioning, and an environment to facilitate wound healing. There is a weight limit of 500 lbs. (225 kg), and the cushion must be properly sized to the individual. The Hybrid Elite Cushion must be used with the supplied cover. Cushion models include:

- ROHO® Hybrid Elite SR™ Cushion (Hybrid Elite SR)
- ROHO® Hybrid Elite® Dual Compartment Cushion (Hybrid Elite Dual Compartment Cushion)

ROHO, Inc. recommends evaluation by a clinician who is experienced in seating, positioning and mobility: 1) to determine whether the cushion is appropriate for the individual; and 2) to determine whether a solid seat platform is recommended if using the cushion on a sling-seat wheelchair.

The Hybrid Elite SR Cushion is compatible with Smart Check® by ROHO®.

ROHO medical products are intended to be part of an overall care regimen. A clinician should make product recommendations based upon an evaluation of the individual’s medical and therapeutic needs and overall condition. A clinician should also evaluate for visual, reading, and cognitive impairment to determine the need for caregiver assistance with product use, including providing a large-print manual.

Important Safety Information

⚠️ Warnings

- Skin/soft tissue breakdown can occur due to a number of factors, which vary by individual. Check skin frequently, at least once a day. Redness, bruising, or darker areas (when compared to normal skin) may indicate superficial or deep tissue injury and needs to be addressed. If there is any discoloration to skin/soft tissue, STOP USE immediately. If the discoloration does not disappear within 30 minutes after disuse, immediately consult a healthcare professional.

- The cushion and the cover MUST be compatible sizes and MUST be used as directed in this manual. IF THEY ARE NOT: 1) The benefits provided by the cushion may be reduced or eliminated, increasing the risk to skin or to other soft tissue, and 2) the individual may become unstable and vulnerable to falling.

- DO NOT use your cushion on top of, or in conjunction with, any other products or materials, except as indicated in this manual. Doing so may cause the individual to become unstable and vulnerable to falling.

- DO NOT place any obstructions (except for a ROHO-provided cushion cover) between the individual and the cushion. Doing so will reduce product effectiveness.

- DO NOT use the components of this product separately. The cushion must be used with all components assembled.

- DO NOT use this cushion as a water flotation device (e.g. a Life Preserver). It will NOT support you in water.

- The cushion surface will acclimate to the surrounding temperature. Take appropriate precautions, especially when the cushion will contact unprotected skin.

- DO NOT expose the product to high heat, open flames, or hot ashes. Testing or certification claims, including for flammability, may no longer apply to this device when it is combined with other products or materials. Check testing and certification claims for all products used in combination with this device.

- If you are unable to perform any tasks described in this manual, seek assistance.

⚠️ Cautions

- DO NOT use a pump, cover, or a repair kit other than those provided by ROHO, Inc. Doing so may void your product’s warranty.

- DO NOT modify the cushion or any components. Doing so may result in damage to the product and will void the warranty.

- DO NOT allow your cushion to come into contact with oil-based lotions or lanolin. They may degrade the material.
Important Safety Information, continued

⚠️ Cautions, continued
- Prolonged exposure to ozone may degrade materials used in the cushion, affect the performance of the cushion, and void the product warranty.
- Changes in altitude may require adjustment to your cushion.
- Keep the cushion away from sharp objects.
- If the cushion has been in temperatures lower than 32°F (0°C) and exhibits unusual stiffness, allow the cushion to warm to room temperature.
- Periodically, check components for damage and replace if necessary. See TROUBLESHOOTING.
- DO NOT use the inflation valve or Quick Disconnect as a handle for carrying or pulling the cushion. Carry the cushion by the cushion base or by the carrying handle on the cover.

Cushion Adjustment

The Hybrid Elite SR is equipped with Sensor Ready Technology and can be used with Smart Check by ROHO, which is a cushion feedback system. Smart Check can be used to find the individual’s inflation level and help check their cushion. For more information, contact Customer Support.

Note: If you own Smart Check by ROHO, STOP HERE and refer to the Smart Check® by ROHO® Operation Manual.

⚠️ Important Safety Information:
- Check inflation frequently, at least once a day!
- DO NOT use an under-inflated cushion or an over-inflated cushion because the product benefits will be reduced or eliminated, resulting in an increased risk to skin and other soft tissue. If the cushion does not appear to be holding air, or if you are not able to inflate or deflate the cushion, see TROUBLESHOOTING.
  Immediately contact your clinical caregiver, distributor, or ROHO, Inc. if the problem persists.
- When possible, use the hook or loop fasteners to further secure the cushion to the seating surface.

Note: For dual compartment cushions, repeat all steps for both valves.

1. Place the cushion in the wheelchair with the air cells facing up and the non-skid surface of the cover facing down.

2. Open the cover flap* and slide the rubber nozzle of the hand pump over the inflation valve. Pinch the nozzle, open the inflation valve, and inflate the air cells.
   *For the Heavy Duty Cover, open the zipper.

3. When the air cells begin to arch slightly, pinch the rubber nozzle of the hand pump and close the inflation valve completely. Remove the hand pump.

4. The individual should sit in the chair in their usual position. Confirm that the boniest prominences are supported by the air cells.

5. Slide your hand between the air cells and the individual. Lift the leg slightly and feel for the lowest bony prominence, and then lower the leg to a sitting position.

6. Open the valve to remove air, keeping your hand beneath the individual’s lowest bony prominence. Release air until you are barely able to move your fingertips. Close the valve.

⚠️ Warning: Make sure that there is at least ½ in. (1.5 cm) of air supporting the individual’s lowest bony prominences.
Cushion Insert Removal and Replacement

Cushion Insert Removal:
1. Remove the cover from the cushion. See Cover Removal.
2. Slide the tubing out of the loop on the foam insert.
3. Remove the tubing from the groove in the foam base and gently pull through the hole in the foam base corner. Repeat for other side.
4. Remove the cushion insert from the contoured foam base.

Cushion Insert Replacement:
1. Place the cushion insert on the foam base, lining up the hook and loop fastener strips. Make sure the cushion insert is centered. Press down to securely attach the cushion insert to the foam base.
2. Insert the tubing through the hole in the foam base corner. Repeat for other side.
3. Slide the tubing through the loop on the foam insert and press the tubing into the groove in the foam base. Repeat for other side.
5. Replace the cover. See Cover Replacement.
Foam Insert Removal and Replacement

Foam Insert Removal:
1. Remove the cover from the cushion. See COVER REMOVAL.
2. Slide the tubing out of the loop on the foam insert. Repeat for other side.
3. Flip the cushion over so that the cells face down and the bottom of the contoured foam base faces up.
4. Pull the foam insert flap away from the hook fastener pieces on the bottom of the contoured foam base. Repeat for the other side.
5. Flip the cushion over so that the cells are face up and the bottom of the contoured foam base faces down. Release the foam insert from the contoured foam base by pulling away from the hook fastener pieces.

Foam Insert Replacement:

⚠️ Warning: The foam insert must be correctly positioned on the contoured foam base.

Note: If the cushion insert was removed from the contoured foam base, replace the cushion insert before replacing the foam insert. See CUSHION INSERT REPLACEMENT.

1. Position the foam insert on the contoured foam base.
   a. The foam insert is next to, but not on top of, the air cells. (A)
   b. The foam insert lines up with, but does not extend past, the front edge of the foam base. (B)
   c. The foam insert is centered on the foam base.
2. Once correctly positioned, press down on the foam insert to securely attach it to the contoured foam base.
3. Slide the tubing through the loop on the foam insert. As needed, push the tubing back into the groove. Repeat for other side.
4. Flip the cushion over so that the cells are facing down and the bottom of the contoured foam base is facing up.
5. Pull and attach the foam insert flaps to the hook fastener pieces on the bottom of the contoured foam base.
6. Flip the cushion over so that the cells are facing up and the bottom of the contoured foam base is facing down.
7. Replace the cover. See COVER REPLACEMENT.
Cleaning and Disinfecting

**Warnings:**
- Cleaning and disinfecting are separate processes. Cleaning must precede disinfection. Before use by a different individual: clean, disinfect, and check product for proper functioning.
- Follow all manufacturer bleach container and germicidal disinfectant safety guidelines.
- DO NOT allow water or cleaning solution to enter the cushion. Water in this cushion can result in damage to the Smart Check and risk to the user.
- Note About Sterilization: High temperatures accelerate aging and will damage the product assembly. ROHO products are not packaged in a sterile condition, nor are they intended or required to be sterilized prior to use. If institution protocol demands sterilization: First, follow the cleaning and disinfecting instructions; then, open the inflation valve and use the lowest possible sterilizing temperature, but not to exceed 70°C (158°F), for the shortest time possible. DO NOT autoclave.

**Cover Care:** Before cleaning and disinfecting, remove the cover from the cushion. Remove the hook fastener pieces from the bottom of the cover.

- **To Clean the Cover:** Machine wash in cold water (30°C) with mild detergent, gentle cycle, or wipe clean with neutral detergent and cold water. Tumble dry low.
- **To Disinfect the Cover:** Hand wash in cold water (30°C) using 1 part household liquid bleach per 9 parts water. Keep the product wet with the bleach solution for 10 minutes, and then rinse thoroughly. Or machine wash in hot water (60°C). Tumble dry low.

**Cushion Care Cautions:** Valve(s) must be closed. • DO NOT allow water or cleaning solution to enter the cushion overlay. • DO NOT machine wash or machine dry the cushion insert or the contoured foam base. • Use of the following may cause damage to the cushion: abrasives (steel wool, scouring pads); caustic, automatic dishwasher detergents; cleaning products that contain petroleum or organic solvents, including acetone, toluene, Methyl Ethyl Ketone (MEK), naphtha, dry cleaning fluid, adhesive remover; oil-based lotions, lanolin, or phenolic-based disinfectants; ozone gas; ultraviolet light cleaning methods.

- **To Clean the Cushion Insert:** Carefully remove the cushion insert from the contoured foam base. Close the inflation valve(s). Hand wash, using mild liquid hand soap, hand dishwashing liquid, laundry detergent, or a multipurpose detergent (Follow product label instructions.) Gently scrub all cushion surfaces, using a soft plastic bristle brush, a sponge or a cloth. Rinse with clean water. Air dry. DO NOT expose to direct sunlight.
- **To Disinfect the Cushion Insert:** Repeat cleaning instructions, using 1 part household liquid bleach per 9 parts water. Keep the product wet with the bleach solution for 10 minutes. Rinse thoroughly with clean water. Air dry.

**Caution:** Rinse thoroughly. Detergent residue may cause air cells to stick together.

- **To clean and disinfect the Contoured Foam Base:** Remove the cover, foam insert and cushion insert. To clean, wipe gently with a cloth dampened with water and a household detergent, then rinse with cool, clean water. To disinfect, follow the cleaning instructions, but use disinfectant instead of household detergent. After cleaning or disinfecting, allow the foam to air dry thoroughly before putting the cover on.
- **To clean and disinfect the Foam Insert:** To clean, moisten a cloth, then wring to remove excess water. Wipe gently with the cloth and a household detergent, then wipe again with a clean, slightly damp cloth. To disinfect, follow the cleaning instructions, but use disinfectant instead of household detergent. After cleaning or disinfecting, allow the foam to air dry thoroughly before putting the cover on.

This symbol means, “Wipe with a damp cloth.”
Storage, Disposal, and Recycling

Storage: Clean and disinfect the product before storing. Open the inflation valve(s). Deflate the product. Store the product in a container that protects the product from moisture, contaminants and damage.

Disposal: The components of the products in this manual are associated with no known environmental hazards when properly used and when disposed of in accordance with all local/regional regulations. Incineration must be performed by a qualified, licensed waste management facility.

Recycling: Contact a local recycling agency to determine recycling options for the product. For more recycling information, contact ROHO, Inc.

Limited Warranty

Limited Warranty Term: 24 months from the date the product was originally purchased. The warranty does not apply to punctures, tears or burns, nor does it apply to the removable cover. See also the Limited Warranty supplement provided with your product, or contact Customer Support.
**Product Specifications**

Materials: Cushion Insert: neoprene rubber; made without latex; Inflation Valve: Zytel; Contoured Foam Base: polyethylene closed cell foam; Foam insert: polyurethane foam. Standard Cover: two-way stretch, spacer fabric sides, with a zipper located in the back of the cover; and a non-skid bottom with hook and loop fasteners to help secure the cushion in the chair; Heavy Duty Cover: two-way stretch, fluid-resistant top and sides, with a zipper located in the front of the cover; and a non-skid bottom with hook and loop fasteners to help secure the cushion in the chair. Refer to cover care label for material content and for compliance to flammability requirements.

Weight: 3¼ lbs. / 1.4 kg (based on 1RHE1817C-SR)

Height: 4 in. / 10.0 cm

*Depths shown include ¾ in. (1.5 cm) of foam base that fits between the wheelchair back posts.

Note: All measurements are approximate. Width and depth measurements are taken from the top of the foam base and are rounded to the nearest ¼ in. or 0.5 cm.

Cushion item numbers and cover tags indicate the wheelchair size the cushion is designed to fit.

Cushion expected lifetime: 5 years
