PRESSURE RELIEF REDEFINED
Dura Core Tilt offers up to 50° of tilt with two range selections:
- -5° to 45°
- 0° to 50° (standard)

THE NEXT EVOLUTION IN SEATING

Developed along with the original Corpus® designer–Bengt Engström–the Corpus 3G features an ergonomic design that follows the contours of the body.

The seat’s width and depth adjustments are indexed and clearly marked for a custom fit, and the adjustable backrest has a strong formed aluminum shell. For added comfort, the seat cushion provides a space for a variety of Ischial inserts. A powerful center-mounted actuator offers up to 50° of tilt, and users can recline up to a full 175°.

Based on cantilever construction, the armrests feature built-in channels for cable routing, significantly reducing the need for wire ties. The legrests are also redesigned and curved for better support. Plus, the Uni-Track System allows users to easily mount a wide variety of accessories and options to their chairs.

**THE NEXT EVOLUTION IN SEATING**

Developed along with the original Corpus® designer–Bengt Engström–the Corpus 3G features an ergonomic design that follows the contours of the body. The seat’s width and depth adjustments are indexed and clearly marked for a custom fit, and the adjustable backrest has a strong formed aluminum shell. For added comfort, the seat cushion provides a space for a variety of Ischial inserts. A powerful center-mounted actuator offers up to 50° of tilt, and users can recline up to a full 175°.

Based on cantilever construction, the armrests feature built-in channels for cable routing, significantly reducing the need for wire ties. The legrests are also redesigned and curved for better support. Plus, the Uni-Track System allows users to easily mount a wide variety of accessories and options to their chairs.

---

**Curved Natural Arc Legrests** provide better support and reduce dorsi flexion during elevation. Legrests offer a height adjustment range from 6” to 20.5”.

**Multi-Axis Armrests** angle and medial swivel independently.

**Armrest** height adjustment is easy to access.

**Footplates** have a higher heel lip, and the adjustment bolt has been repositioned to avoid snags during transfers.

**Uni-Track System** allows users to easily mount a wide variety of accessories and options to their chairs.

**Uni-Track System** rail at top of backrest allows for over 7” of lateral headrest positioning.

**Integrated Cable management system** significantly reduces the need for wire ties.
**Easy split back**
with 1” increment adjustments
disassembles easily for transport

**EZ Mount**
attachment system
allows for after-market backs

**Clean open design**
with flat seat pan allows for
after-market cushions

**Seat pan**
width & depth adjustments
indexed & clearly marked
