How to Use the Custom AGILITY Back System Order Form

ROHO® understands that the needs of your clients are unique. For that reason, we are offering the Custom AGILITY back.

You can now use ROHO’s DRY FLOATATION® technology to specifically address your client’s postural needs. You determine exactly what air cells you need and where, the size of the air cells, and how many compartments of adjustable air are required.

STEP 1: Quick Release or Fixed Hardware

Check one

Quick Release
Quick Release hardware makes removal for transport or storage a snap, even by those with limited hand dexterity. Simply unlock it and lift it by the handle.

Fixed
Fixed hardware is ideal for clients who rarely need to remove their replacement backs (available in heights 16 inches and lower).

STEP 2: Each box on the featured shell can hold an air cell. Please determine where you would like air cells and the types of air cells needed.

1 1” or 2.5 cm
2 LOW PROFILE® (2.25” x 5.5 cm)
3 MID PROFILE™ (3.25” x 8.5 cm)
4 HIGH PROFILE® (4.25” x 10.5 cm)

STEP 3: Custom AGILITY backs give you the options (or) option to create different adjustable air compartments. Please circle the compartments needed for this Custom AGILITY back.

STEP 4: Please note any special considerations, especially valve locations, you would like our team to know about this custom AGILITY back.
