ROHO® HARMONY® Cushion

- Adaptable to an individual’s shape
- Adds minimal weight to entire mobility system
- AIR FLOATATION™ for increased comfort
- Competitively priced

The HARMONY Cushion from ROHO provides an individual with a lightweight, stable solution. By combining a ROHO AIR FLOATATION cushion insert on top of a pre-contoured foam base that is encased within a fluid-resistant cover, the individual can maintain independence and freedom without the worry of adding unnecessary weight to their mobility system.

Finding a cushion that is comfortable, matches the individual’s shape and addresses today’s challenging funding climate shouldn’t be difficult. Think HARMONY from ROHO.

AIR FLOATATION

Using ROHO AIR FLOATATION technology the HARMONY Cushion allows for change in air inflation and immersion level, providing skin/soft tissue protection and accommodation to the individual’s shape and position.

LIGHTWEIGHT

Individuals spend thousands of dollars to shave a few pounds off of a wheelchair, overlooking how the cushion impacts the weight of the entire mobility system. At 1.25 lbs. (0.6kg), the HARMONY Cushion adds minimal weight to an individual’s mobility system.

STABILITY

Stability builds a foundation of function. If an individual is working to achieve balance or stability they may have difficulty achieving functional goals. The HARMONY cushion is built on an anatomically-shaped foam platform that enhances the individual’s seated stability and helps maximize their functional potential.

COMFORTABLE

Comfort is a must. The HARMONY includes ROHO AIR FLOATATION technology positioned over a foam base that provides a shape-fitting interface to minimize tissue deformation.
ROHO HARMONY® Cushion

Applications

ROHO HARMONY CUSHION IS APPROPRIATE FOR INDIVIDUALS WHO:

• currently have skin/soft tissue breakdown (lesser stage pressure ulcer following a clinical assessment)
• are at risk for skin/soft tissue breakdown
• have normal or impaired sensation
• require increased sitting stability
• require lower extremity alignment
• experience discomfort from prolonged sitting
