Permobil introduces the M400 Corpus® 3G—a high-speed version of the popular M300 mid-wheel drive—that is engineered to get up to 7.5 MPH. Like its predecessor, the M400 features the groundbreaking, patent-pending Climbing and Traction Link system, which provides overall stability especially while climbing obstacles and traversing various surfaces. The M400 has a tight 20” turning radius and comes with PG 120 amp R-Net electronics. Plus, the Corpus 3G seating system offers an array of functionality and adjustment. Users can tilt up to 50° and recline up to a full 175°. The legrests are curved for better support, and the armrests feature built-in channels for cable routing, significantly reducing the need for messy wire ties.
